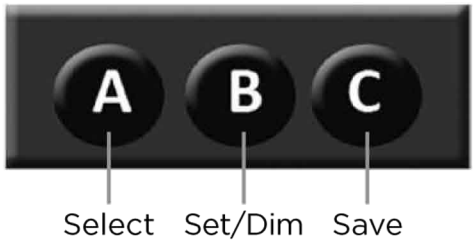
LED Digital Clock
Manual

Setting Buttons

A Pressing **A** will allow you to select which of the fields you want to change (fields are Year, Month, Day, Hour, Minute).

B When field is selected, press **B** to change it. (Once set pressing again will change to next field).

C Once all fields are set press **C** to save and exit setup.



Setting the Clock

1. Press **A**, the "Year" field will start flashing in the minute section. Press **B**, to set the year.
2. Press **A**, again, the "Month" field will start flashing. Press **B**, to set the month.
3. Press **A**, to select the "Day of the Month" field. Press **B**, to set the day. (Day of the Week will set automatically after selecting the year)
4. Press **A**, to select the "Hour" field. Press **B**, to set the hour.
5. Press **A**, to select the "Minute" field. Press **B**, to set the minute.
6. Press **C**, to save your settings and exit.

Adjusting the LED Brightness Level

Press **B** once to dim, Press the B again to dim even more, press it again, and it will set to maximum brightness.
